

A. Figure 3A polytroubles

Top 5% observed EID risk, summed pressure, and overlap shown as separate classes

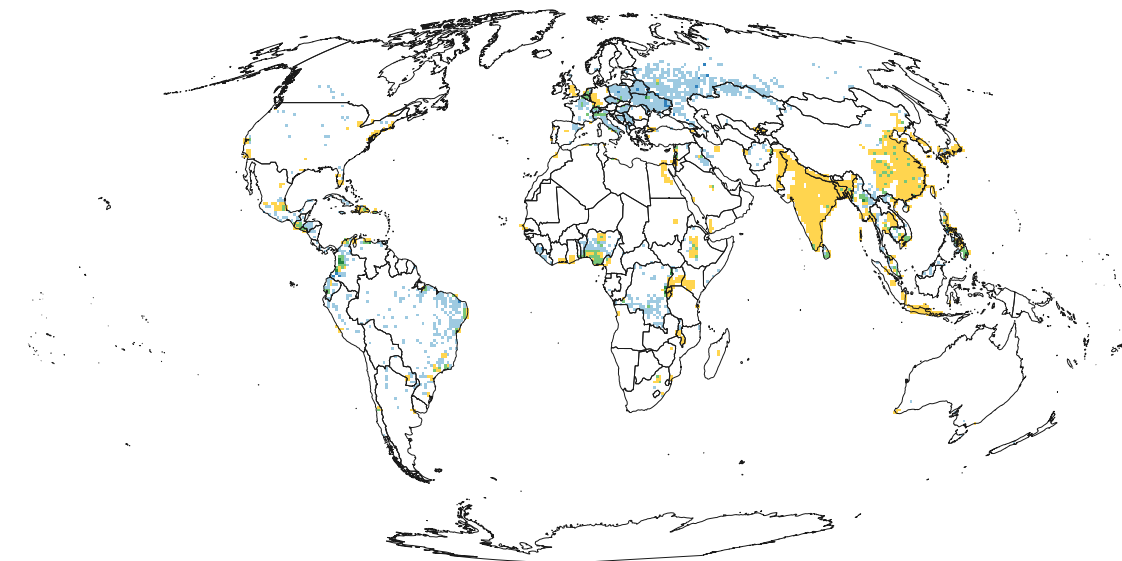

Map class

- Summed pressure 2 only
- Summed pressure 3 only
- Top 5% EID only
- Overlap: 2 + EID
- Overlap: 3 + EID
- NA

is outside summed-pressure classes 2 and 3. Green shows overlap with summed-pressure classes 2 or 3.

B. Figure 3B polytroubles

Top 5% bias-corrected EID risk, summed pressure, and overlap shown as separate classes

Map class

- Summed pressure 2 only
- Summed pressure 3 only
- Top 5% EID only
- Overlap: 2 + EID
- Overlap: 3 + EID
- NA

Yellow shows Figure 3B top 5% EID cells outside summed-pressure classes 2 and 3. Green shows overlap with summed-pressure classes 2 or 3.
